: Description

GWS250-520480 series is a 250W single-output enclosed type power supply with a low profile design. Adopting the full range 90-264VAC input.

In addition to the high efficiency up to 93%, the design of metallic mesh case enhances the heat dissipation of the power supply that the whole series operates from -20 °C to 65 °C under air convection. Delivering an extremely low no load power consumption (Less than 0.2W), it allows the end system to easily meet the worldwide energy requirement. It as the complete protection functions and complied with international safety regulations. The series serves as a high price-to-performance power supply solution for various applications.
